

Dear FCC,I support the petition to refuire VRS interoperability. I am Frustrated with the different ways to call people on videophone, because I dont like wasting time..I dont like that my vrs is blocked and sometimes I have to wait too long. Because of emergency case needed.. Not Delay time, it is very important to make everyone equally accessible by setting up one system just like telephone because hearing people can call for order pizza or business or friends or ect so not fair....We want to be equally deaf and hearing together.. Thank you for this opportunity to make my comment. And also I have a problem with vp and it is not working I have to wait for someone who works for vp that will come by it make me wait longer so need more workers around so it would not make wait longer.. Thanks again !!!!
